## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IB2004/002754

_			
_	Во	X N	o. I Basis of the opinion
1.	Wi the	th re	gard to the language, this opinion has been established on the basis of the international application in guage in which it was field, unless otherwise indicated under this item.
		iar	ils opinion has been established on the basis of a translation from the original language into the following iguage , which is the language of a translation furnished for the purposes of international search inder Rules 12.3 and 23.1(b)).
2.	Wit	th re cess	gard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application and ary to the claimed invention, this opinion has been established on the basis of:
	a. t	ype	of material:
	i		a sequence listing
	1		table(s) related to the sequence listing
	b. fe	orma	at of material:
	Į		in written format
	(		in computer readable form
	c. ti	me	of filing/furnishing:
	נ	⊐	contained in the international application as filed.
		<b>_</b>	filed together with the international application in computer readable form.
	כ	<b>3</b>	furnished subsequently to this Authority for the purposes of search.
3.	0	has	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto been filed or fumished, the required statements that the information in the subsequent or additional sies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.
4,	Add	ition	al comments:

## Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1. Reference is made to the following document:
  - D1: PATENT ABSTRACTS OF JAPAN vol. 0060, no. 85 (C-103), 22 May 1982 (1982-05-22) & JP 57 016689 A (SAKURA UZUMAKI SYUZO KK), 28 January 1982 (1982-01-28)
- 2. Document D1, which is considered to represent the most relevant state of the art, discloses (cf. abstract) a method for manufacturing shochu having a unique flavour, from which the subject-matter of claim 1 differs in that the water, which is used for preparing the starter mash and which is added to the final mixture to be fermented contains 300-1000 mg / kg bicarbonate ions.
- 3. The subject-matter of claim 1 is therefore new (Article 33(2) PCT).
- 4. The problem to be solved by the present invention may be regarded as the provision of a method for preparing shochu, wherein the product has a unique and appealing taste.
- 5. The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:
  Using water containing 300-1000 mg / kg bicarbonate ions for preparing shochu starter mash and/or shochu mash is not taught in the prior art. Further, starting
  - starter mash and/or shochu mash is not taught in the prior art. Further, starting from what is disclosed in the prior art, there appears to be no incentive to the skilled person to make use of water containing 300-1000 mg / kg bicarbonate ions in shochu production, because there is no reason to expect that using said water for preparing the shochu mash could improve the quality of the distillate.
- Claims 2-5 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
